PROFESSIONAL SUMMARY

Python backend developer with four years building scalable, high-load systems. Specialises in Django, FastAPI, PostgreSQL, Redis and Celery - from API design and JWT/OAuth2 security to Kubernetes deployment and pytest-driven testing. Has also taught backend engineering to 280+ students.

WORK EXPERIENCE

Backend Architect, UNICON UZ — Tashkent, Uzbekistan — Mar 2026 - Present

- Backend architect on e-expert.uz, a digital asset-valuation platform used mainly by banks for loan-collateral appraisal, alongside government bodies and independent experts — real estate, vehicles and specialised machinery. Platform runs at 99.2% valuation accuracy with results in under 5 minutes, ISO 27001-compliant data security, and an interactive map of valued objects with regional market analytics.
- Own the backend: pricing engines pulling government cadastral and registry data, re-architected to cut the heaviest valuations from minutes to seconds, plus security hardening against a ministry-level cybersecurity review.

Backend Lead (equity), Kigo — Tashkent, Uzbekistan — Jul 2025 - Present

- Backend lead on kigo.uz, a sports-club booking and tournament ecosystem: court reservations, a merchant panel for club owners, a coach marketplace, bar POS, subscriptions, and three tournament systems (club brackets, open-game matchmaking, government competitions). Designed the domain model and API surface; the team ships from a published OpenAPI spec on a reviewed pull-request workflow.

Backend Development Instructor, Farobiy Academy — Tashkent, Uzbekistan — Apr 2025 - Feb 2026

- Taught backend development (Python, Django, FastAPI, PostgreSQL) to 250+ students, with curriculum covering REST APIs, database optimization, and deployment practices. Conducted code reviews and mentored students on production-ready backend design patterns.

Backend Developer, Cybernet AI — Tashkent, Uzbekistan — Sep 2024 - Feb 2025

- Built FastAPI microservices for LLM-powered voice bots in banking automation, enforcing JWT/OAuth2 security and validation, with Swagger/OpenAPI docs throughout. Improved document lookup performance 60% via PostgreSQL query optimization, indexing, and Redis caching.

Backend Engineering Mentor, Astrum IT Academy — Tashkent, Uzbekistan — Sep 2023 - Sep 2024

- Standardized backend curriculum for 30+ students, increasing program completion rates by 20%. Led 50+ industry-standard code reviews focused on algorithmic efficiency and production-ready Python backend patterns.

Python Developer (Internship), VEON AdTech — Tashkent, Uzbekistan — Jan 2023 - Sep 2023

- Automated data processing workflows using Python, SQL, and Pandas to analyze customer behavior across 20M+ records for retention modeling; built queries and scripts for ad performance analytics.

SKILLS

Languages: Python, SQL, C, C++, JavaScript
Backend: Django, DRF, FastAPI, Celery, aiogram, microservices, REST APIs, OpenAPI
Data: PostgreSQL, Redis, pgvector, Weaviate, SQLite
DevOps & Tools: Docker, Kubernetes, Nginx, Linux, CI/CD, AWS, Git, Pytest

EDUCATION

Tashkent University of Information Technologies — Bachelor of Digital Economy — 2023 - 2028
Astrum IT Academy (Qwasar Silicon Valley Program) — Software Engineering — 2022 - 2023 — set the all-time academy record for the fastest completion of the Software Engineering C Track; completed 60+ projects in C and Assembly focused on memory safety and algorithmic optimization.
